

THE IN-VEHICLE INFOTAINMENT SYSTEM: THE 'BRAIN' OF YOUR VEHICLE.

The In-Vehicle Infotainment (IVI) system combines entertainment and information delivery to drivers and passengers. Considered 'the brain of a vehicle', it controls many functions that are critical for vehicle performance.

Here are some of the functions controlled by the infotainment system:

1. Speedometer
2. Fuel gauge
3. Charging parameters
4. Manufacturer's vehicle application parameters
5. EV planning
6. Driving Mode Management (EV)
7. Heating and air condition settings
8. Camera 360
9. Navigation
10. Sound system: tone adjustment, sounds
11. Back up sonar
12. Bluetooth
13. Radio AM/FM
14. Apple Car Play and Android Auto
15. Phone accessibility: telephone, messages
16. Clock, lighting, and other settings
17. Display settings
